

## 2022 Society of American Florist's Sylvia Cup Design Competition Floral Source List

On behalf of the members of Certified American Grown, several of our select farms are proud to provide the beautiful products being utilized for the Sylvia Cup competition. Our farms have worked tirelessly to grow a wide variety of cut flower and foliage materials that provide designers with a broad palette to work with. We encourage you to visit [americangrownflowers.org](http://americangrownflowers.org) to learn more about our farm members, how to contact them to source more of these and other incredible materials, and to find ways you can become further involved in our programs and activities. Remember, by sourcing your flowers and foliage from American farms you are not only wisely supporting homegrown businesses, but you are also positively impacting communities and families right here in the United States.
